IUCN GREEN LIST STANDARD

IUCN Green List of Protected and Conserved Areas: Standard, Version 1.1

The global standard for protected areas in the 21st Century

Supported by:

based on a decision of the German Bundestag

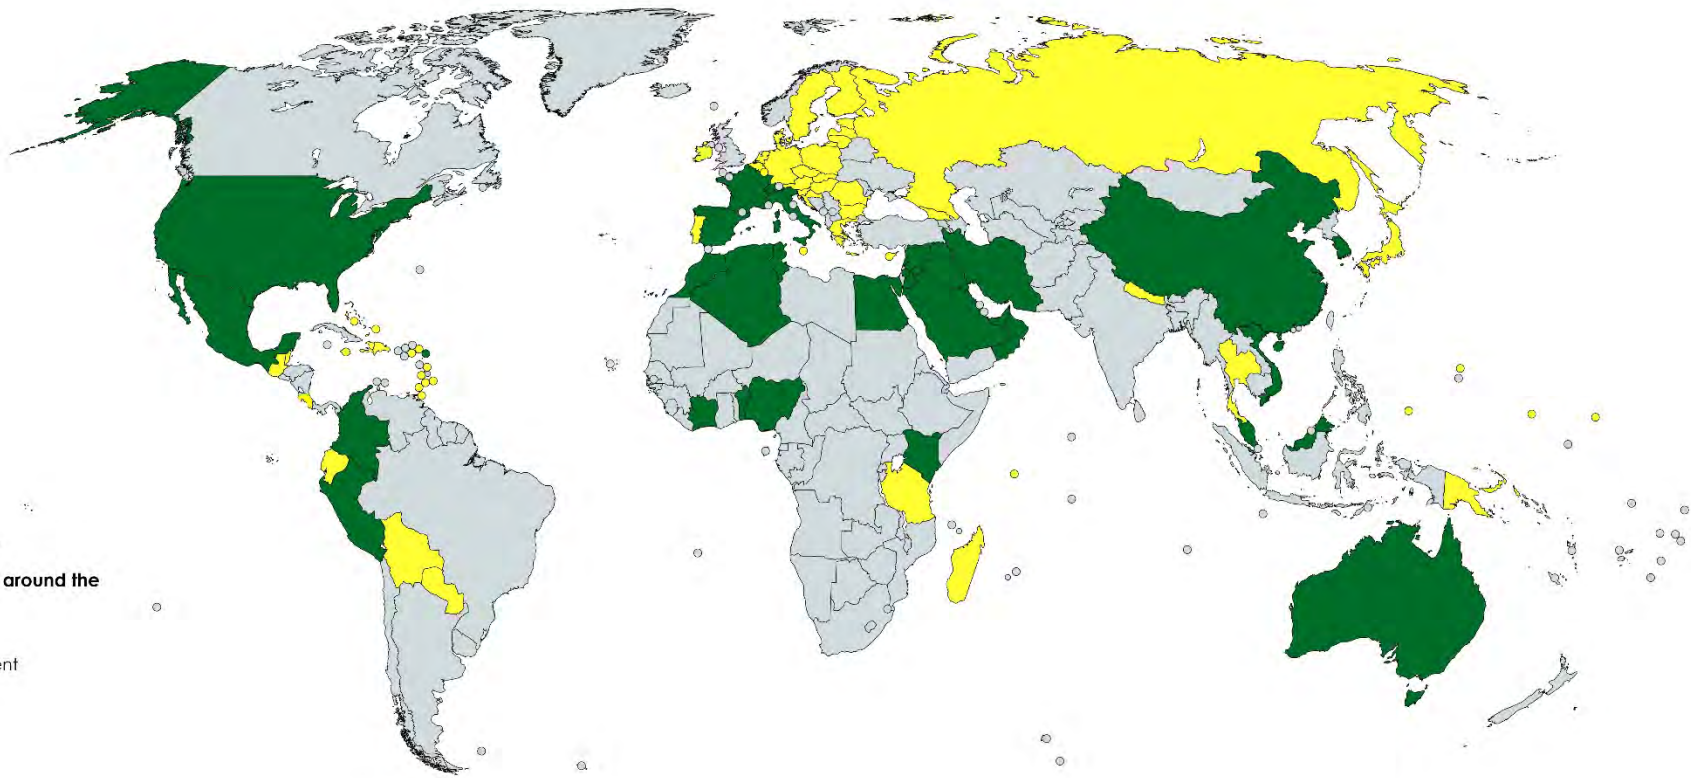

Going global

- 24 PAs listed in pilot phase (incl. France (Overseas territory) Guadeloupe National Park)
- 23 EAGLs established
- 43 protected or conserved areas registered
- Many partners supporting Green List implementation
- IUCN Secretariat staff
- WCPA Green List Specialist Group

IUCN Green List around the world

- Active
- In development

Q
↓ WDPA Dataset

The map displays the world with terrain shading and green areas representing protected regions. A search bar is located in the top left, and a 'WDPA Dataset' button is next to it. The IUCN Green List logo is in the bottom right corner of the map area. The map shows various countries and oceans, with green patches indicating protected areas.

The designations employed and the presentation of material on this map do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The IUCN Green List Standard

The IUCN Green List Standard is organised into four components of successful nature conservation in protected and conserved areas. The baseline components concern:

- Good Governance
- Sound Design and Planning
- Effective Management

Together, these support the component on Successful Conservation Outcomes attesting to the successful achievement of an area's goals and objectives. Each component has a set of criteria, and each criterion has a set of indicators to measure achievement.

The Criteria are globally consistent requirements that collectively describe the efforts needed to fully achieve the Standard. A Green List site is one that is currently evaluated to achieve all criteria, across all four components. The standard is implemented through a jurisdictional approach, tailored to each country or region where it is adopted. The programme allows for flexibility for each jurisdiction to implement the Standard. For each criterion in the standard, a set of generic indicators and associated means of verification is maintained by IUCN. These generic indicators may be adapted to the context of each participating jurisdiction, to allow for reflection of regional and local characteristics and circumstances in which protected and conserved areas operate.

Apply now to join the IUCN Green List

- <http://iucn.force.com/greenlist/>

The screenshot shows the IUCN logo in the top left corner. The main heading is "Protected and Conserved Area Application Form for the 'IUCN Green List Programme'". Below the heading, there are four paragraphs of text explaining the application process. The text is as follows:

To be added to and remain on the IUCN Green List, PAs need to complete a process that is made up of three Phases: Application – Candidate – Green List.

By completing and submitting this form, the PA registers its interest in the Green List and commits to demonstrating a level of performance that is compliant with the requirements of the Green List Standard, within five years of signature.

The application form shall be submitted by the person who will take the lead on the PA's Green List application. This can be a PA Manager or an appropriate member of staff of the PA or of the respective Agency of the PA.

Once the registration has been accepted by IUCN, the PA will enter the Application Phase and the PA representative will be provided with a login to COMPASS, the online portal that is used to administer the Green List Programme.

Before completing this form, the applicant PA shall carefully read the 'Green List Standard', the associated set of 'Generic Indicators' (or, if available, the set of 'Adapted Indicators' for the respective jurisdiction) and the 'Green List User Manual' available on <https://www.iucn.org/theme/protected-areas/our-work/green-list>.

There are "Next" buttons in the top right and bottom right corners of the page.
